

ONLINE MEETINGS OF THE **WORLDWIDE ENERGY NETWORK**

W-ENER

TRANSPORTATION ELECTRIFICATION

**The Future Impact of New Technology
on Travel in a Post-COVID19 World**

PRESENTATION

The **Technological Center of Energy Conversion**, in collaboration with **Macrofacultad of the Faculty of Engineering of the University of Talca**, is pleased to invite you to participate in the "Online Meetings of the Worldwide Energy Network", a space created to generate debate and discussion through the web on issues related to energy, particularly in the area of energy efficiency and clean energy generation.

The talk on May 19th will be presented by Prof.-Dr. Patrick Wheeler, Head of the Power Electronics, Machines and Control Research Group and Global Director of the University of Nottingham's Institute of Aerospace Technology. He will be accompanied for Prof.-Dr. Bulent Sarlioglu from Wisconsin University, USA and Prof.-Dr. Fernando Briz from University of Oviedo, Spain

W-ENER will constitute a point of convergence between academia, industry and state organisms, in addition to serve as an impetus for cooperation between participants, which include academics, researchers, authorities, businessmen, and the community in general. They will also contribute to the generation and dissemination of knowledge to the national and international community, and will contribute to the challenge we are facing in terms of virtualization.

WENER will be held every two weeks, via the Zoom platform and YouTube Live.

To request access to the Zoom and Youtube Live link, please register at https://bit.ly/WENER_1905
